PROFILE

Motivated and detail-oriented MERN Stack Developer with strong proficiency in both frontend and backend technologies. Experienced in creating responsive, user-friendly interfaces and robust backend APIs. Passionate about developing scalable web applications using modern frameworks and libraries.

PROJECTS (OR WORK EXPERIENCE)

BlogVault - MERN Stack Blogging Platform

Developed a full-featured blogging web application using React.js, Redux Toolkit, Node.js, Express.js, and MongoDB

- Developed a full-featured blogging web application using React.js, Redux Toolkit, Node.js, Express.js, and MongoDB
- Implemented user roles: Admin and Normal Users
- Authentication using JWT stored in cookies
- Admin panel with functionalities to add, edit, publish/unpublish blogs, manage users, and approve comments
- Integrated a rich text editor (Quill.js) for blog creation
- Responsive UI with sidebar navigation and mobile-friendly layout
- State management with Redux Toolkit and notifications using React-Toastify

E-Commerce Website (MERN Stack) - (Personal project)

- Develop and maintain strong relationships with partners, agencies, and vendors to support marketing initiatives.
- Monitor and maintain brand consistency across all marketing channels and materials. Developed a fully functional e-commerce web application using React.js, Node.js, Express.js, and MongoDB.
- Features include user authentication (JWT), product listings, search/filter, cart functionality, and order checkout.
- Admin dashboard for product and order management.
- Utilized Multer for image uploads, Redux Toolkit for state management, and protected routes for role-based access.
